Anas Mohammed

Senior Full Stack Engineer · Web Lead · AI-Agentic Development

Dubai, UAE | anasmohammeddev@gmail.com | linkedin.com/in/anas-mohammed-8a0321324

SUMMARY

Senior full stack engineer with 10+ years building and shipping production web apps end to end, from fast static sites to complex React apps. Founding engineer and former team lead who has made architecture calls and stayed long enough to live with them. Sets up the shared standards that let a team ship safely: code review, CI/CD, testing and deployment. Builds with Claude Code every day, with project-level conventions and hooks as guardrails so AI-written code stays secure and consistent.

SKILLS

Web	TypeScript, React, Next.js, Vite, Tailwind, TanStack Query, accessibility, performance
AI-agentic dev	Claude Code (layered CLAUDE.md, PreToolUse hooks, subagents, plan mode), Cursor
APIs & backend	GraphQL, REST, Node.js, Python (FastAPI)
Delivery	CI/CD, code review standards, testing, Docker, Vercel, AWS, Sentry
Data	PostgreSQL, Supabase, Redis, MongoDB
Leadership	Team lead, architecture, mentoring, working with designers

EXPERIENCE

Tempo (YC S23) - Canada, Remote — Jan 2025 - Present

Senior Full Stack Engineer (Founding Engineer)

- Built and scaled end-to-end web features with React, Next.js and TypeScript on Node.js and GraphQL backends, with a focus on performance and reliability.
- Runs an AI-agentic workflow in Claude Code with committed project conventions, hooks that block sensitive paths, and phased plans, so generated code is reviewed, tested and consistent.
- Designed REST and GraphQL APIs in Node.js and Python (FastAPI) handling complex business logic and high-volume data flows across microservices.
- Integrated LLMs and AI agents using the OpenAI and Anthropic APIs, turning messy inputs into structured, reliable outputs.
- Modeled and tuned data across PostgreSQL, MongoDB and Redis to cut latency in key backend workflows.
- Deployed and ran services on AWS with Docker and CI/CD, owning monitoring and production stability.
- Led code reviews, raised engineering standards and shaped architecture decisions across the stack; works directly with client teams to ship what they need.

FusionCode - UAE — Feb 2022 - Dec 2024

Senior Full Stack Developer / Team Lead

- Led a team of engineers as the senior technical point of contact, running sprint planning and code reviews and keeping delivery on track.
- Owned architecture across React/TypeScript and Node.js, deciding how features were structured before any code was written.
- Led the full React Native effort from scoping to a production-ready cross-platform release.
- Mentored junior and mid-level engineers through reviews and pairing, raising code quality across the team.
- Worked with UX designers as the senior engineering voice, balancing design intent with technical feasibility.

React, TypeScript, React Native, Node.js, MongoDB, AWS

Ample - United States, Remote May 2019 - Feb 2022
Senior Full Stack Engineer

- Acted as senior engineer and de facto tech lead across several product tracks, turning stakeholder needs into engineering plans and owning delivery through deployment.
- Led a team of developers day to day, setting standards and taking on the hardest technical work.
- Built a GraphQL API layer from scratch to replace a fragmented REST setup, improving data fetching performance and making the codebase easier to extend.
- Shipped core React and Node.js features used daily by a large and growing user base, with MongoDB and solid QA before every release.

Modus Create - United States, Remote Mar 2018 - Feb 2019
Full Stack Engineer

- Engineering lead on client projects, running discovery sessions and presenting technical recommendations to stakeholders.
- Built fast, accessible React and Next.js frontends where load time and accessibility were hard requirements.
- Managed AWS Amplify infrastructure across environments, owning deployments and production incidents.

Digicust - Canada, Remote Jan 2016 - Jan 2018
Full Stack Engineer

- Built full-stack web apps from the ground up with React, Next.js and Node.js, from UI to server logic and database.
- Built interactive data visualization tools that gave non-technical stakeholders a clear view of the product.
- Improved performance and made responsive layouts work reliably across devices.

PROJECTS & OPEN SOURCE

RentManager - In production

- React and Vite app on Supabase with magic-link auth, deployed on Vercel. Replaced a spreadsheet system for 16 rental flats and migrated years of billing history.

Meetex - Live on the App Store

- Location-based meetup app for expats in Dubai, built solo from idea to App Store release, with its own marketing landing page.

supabase/storage - Open source

- Opened a PR validating user metadata in the upload path, with unit tests.

EDUCATION

Institute of Management Studies, DAVV, Indore 2012 - 2016
Master of Business Administration
